CHASE WINTHROP & ASSOCIATES, LLC.

### **Network / Security Design**

A sound network infrastructure is the key to an effective business system. Our Network design team can help you design a new network or evaluate your existing network to ensure it is secure, reliable, well documented and easy to maintain.

### **Network Development and Support**

Do you have a well developed network in place? If not, CWA provides site planning and development, site surveys and project reviews and technical staffing. Management. includes Network design and installation of UTP/STP cabling installation for CAT 3, 5, 6 premise wiring systems. Support services provide installation support for equipment room build outs including cabinets, racking, UPS systems, switching equipment, shelving

and all other aspects of the typical network room infrastructure whether you need a new network or improvement in your current system.

### **Corporate Training**

Training programs can be designed to fit your company's specific needs including such subjects as "Time Management", "Being a Better Supervisor" and many others. We also have training for most all Microsoft Office programs such as Outlook, Word, Excel and PowerPoint.

### **Hardware & Software Purchasing**

Let CWA help you with your volume computer and software purchasing as well as your Licensing issues. As a DELL and Microsoft Partners, CWA can help you ensure that you are getting your software at the best possible prices as well as help you keep track of your software licensing compliances. Software infringement fines can be triple the original cost of software purchase should a violation occur.

### **Website Design & Support**

Our web team is willing and able to do everything you need for your company's website. We can register a new domain name, create a new website or upgrade your current site. Our web team can also help you target market your customers through your website to get you the business you're looking for.
